

Balm Balm
100% organic skincare

The UK's Leading
100% Organic Skincare Range

ABOUT BALM BALM

The Balm Balm range is a unique collection of totally pure, super effective water-less Skincare Balms created by hand to exacting Soil Association standards.

The company was founded in 2005 by Glenda Taylor and is built on her years of experience as an aromatherapist, perfumier and natural formulation consultant . Her aim was to create an affordable, 100% organic Skincare range for the whole body, perfect for even the most sensitive of skins, and to leave as Green a footprint as possible.

Today the range continues to be lovingly made by hand with every finished product certified 100% organic and 100% natural; free from Parabens, SLS's and Preservatives and with all ingredients clearly listed and BUAV approved.

The range has grown to include multi-tasking Balms for the whole body; Bath and Body Oils for babies and grown ups; Eau de Parfums that can be used individually or layered; organic Essential Oils and a Facial Skincare range for all skin types.

Therapeutic, gentle, versatile and as organic as humanly possible. Balm Balm is absolute natural goodness for your skin.

All our balms are made from Shea Butter, Beeswax, Calendula, Sunflower & Jojoba Oils. This base, which is our Fragrance Free Balm, is suitable for moisturising any part of your body and is so gentle that it can even be used on new born babies.

People suffering from eczema & psoriasis often experience great benefits from our fragrance free balms purely because they contain no chemicals whatsoever.

The Balm Balm Frankincense Range:

Three wonderfully effective organic products to keep your skin feeling happy, healthy and youthful. Made from organic oils and waxes, each product will work synergistically with all skin types. This is because your skin will absorb as much or as little of their precious ingredients as it needs.
